Education

SaiGon Technology Univecity District 08, Ho Chi Minh City
Information Technology Engineer 2021 – 2025

Technical Skills

- PHP
- Laravel
- Git
- MySQL
- Python
- Material
- Claude Code
- Spring Boot
- Filament
- Cursor
- Firebase
- RESTful API

Experience

C3TEK Digital Marketing Solutions District 10, Ho Chi Minh City

Fresher PHP Developer | Property Management Application *02/2025 – Present*

- Engineered RESTful APIs and backend logic using Laravel 12 and PHP 8+ for a core contract management module, enabling seamless creation, termination, and lifecycle tracking of rental agreements.
- Automated monthly invoice generation and complex utility fee calculations (electricity, water), streamlining billing workflows and reducing manual data entry for property managers.
- Designed and optimized MySQL database schemas utilizing Eloquent ORM relationships, ensuring high-performance data retrieval and structural integrity for contracts and financial records.
- Implemented strict Role-Based Access Control (RBAC) to secure sensitive system data across a 4-tier user architecture (Owner, Admin, Manager, Sale).
- Integrated automated PDF generation and export capabilities for contracts and invoices, facilitating efficient document management and record-keeping.
- Collaborated within an agile 6-member cross-functional team to deliver a scalable platform featuring online room booking and integrated payment tracking.

Personal project District 08, Ho Chi Minh City

Medical Appointment Booking System | Backend Developer *05/2025 – 08/2025*

- Engineered RESTful APIs using Spring Boot to drive core system functionalities, encompassing appointment scheduling, user account management, and medical service catalogs.
- Implemented a robust and secure authentication architecture utilizing Clerk for seamless user sign-in and Spring Security with JWT for strict API authorization.
- Integrated third-party payment gateways (VNPay APIs) to process secure, real-time online financial transactions for medical bookings.

- Architected and managed scalable database schemas to ensure efficient data storage and retrieval for patient records and appointment lifecycles.
- Collaborated directly with a frontend developer in a fast-paced, 2-person agile environment to deliver a fully functional React-based web application.

Personal project District 08, Ho Chi Minh City

ChatBot (ChatGPT Clone) | Android Developer *10/2024 – 03/2025*

- Developed an Android-based conversational AI application using Kotlin, replicating core interactive features of ChatGPT.
- Integrated Firebase as a Backend-as-a-Service (BaaS) to manage real-time data synchronization, user interactions, and cloud storage efficiently.
- Optimized the mobile user interface and API response handling to ensure smooth, low-latency conversational experiences.
